GGNomad

PRODUCT CATALOGUE

Every leg, every booking, one trip.

The AI-native platform for travel, tourism, activities and entertainment, for the people who travel and the businesses that serve them.

Air, sea, road and rail | Rentals in the trip | All your travel apps | Groups and communities | Tour operations | AI travel companion

ggnomad.com

01 · THE SHORT VERSION

One platform for everything that happens when people travel

GGNomad is one AI-native platform for everything that happens when people travel, and for the businesses that make it happen. Travelers plan, book and manage journeys leg by leg by air, sea, road and rail in any kind of vehicle, rent the bike or car they need, bring the travel sites and booking apps they already use into one place and travel together. Tour and travel operators run their whole business on the same trip record, and everyone has a companion that knows the whole trip.

Every leg, every vehicle

Door-to-door journeys by air, sea, road and rail, with connections checked before you book.

Rentals inside the trip

Bikes, scooters, cars, campervans and boats, timed to the trip and compared by full cost.

All your travel apps, together

Compare across the sites and apps you already use and bring every booking onto one timeline.

Travel together

Groups vote, book and split costs fairly; communities run their own trips again and again.

Run the whole business

Operators design, price, sell, run and settle tours in one workspace.

A companion that knows your trip

Free conversation in your language that plans, books with consent, watches and re-plans.

Activities and entertainment

Stays, tours, experiences, events, shows and nightlife on the same timeline.

Part of the Burdenoff group

MoveTheWheels, AssetHandler, PlanMagnet, FluidGrids and more, under one sign-in.

02 · WHO IT IS FOR

Both sides of travel, on the same trip record

Travelers, groups and communities plan, book and travel. The businesses that serve them design, sell and run the trips. A change on one side reaches the other at once.

Travelers
Solo travelers, couples, families, backpackers, road-trippers, riders, business travelers and fans.

Groups and communities
Friends, families, schools and companies, riding and trekking clubs, alumni and pilgrim groups.

Tour and travel businesses
Tour operators, destination management companies and agencies running tours end to end.

Fleets, transport and hosts
Rental operators, bus, coach and ferry operators, hosts, activity providers and venues.

Corporate travel teams
Policies, approvals, offsites and one view of travel spend.

Tourism boards
Destination organizations running a regional marketplace of local businesses.

Guides and drivers
Professionals hired for departures and assigned on the run-sheet.

And one companion for all
Everyone can talk to a companion that knows the whole trip.

03 · WHAT BREAKS TODAY, AND THE FIX

A real trip is pieced together from many apps

A flight on one, a train on another, a ferry ticket bought at the port, a scooter rented by phone, a hotel and a tour on two more sites, a group chat to decide and a spreadsheet to settle up. Operators have the same problem from the other side.

A trip is four apps and four confirmations

GGNomad plans, books and manages every leg as one journey, connections checked.

Rentals hide the real cost

Rate, deposit, distance limit, fuel, delivery and protection side by side; photos at both ends.

Bookings are scattered everywhere

Compare across the apps you already use and bring every booking onto one timeline.

Groups drown in chats and spreadsheets

Votes, one checkout or each their own share, and a fair settle-up.

Operators juggle tools that do not talk

One workspace from tour design to departure P&L, on the record the traveler sees.

A delay leaves the traveler alone

The companion watches every leg and has plan B ready, then tells everyone affected.

04 · EVERY LEG, EVERY VEHICLE

Door to door by air, sea, road and rail

A journey is one chain of legs, and every leg can be any mode and any vehicle. GGNomad checks the connections before you book and keeps plan B ready.

Door to door

Complete chains ranked by cost, time, comfort, emissions or fewest changes.

Connections checked

Transfer times, terminal and port changes, desk hours and night arrivals.

Book per leg or the chain

One checkout with taxes, fees, deposits and terms itemized.

Plan B ready

Live status per leg; any change re-checks the rest of the journey.

04 · EVERY LEG, EVERY VEHICLE

Any mode, any vehicle, any operator

Scheduled or charter, shared or private, rented or your own. Bus, coach and ferry operators publish their routes and schedules on the same booking spine, so their seats become legs of real trips.

Flights · Charters · Sleeper and intercity trains · Metros and rail passes · Buses and coaches · Shuttles and shared cabs · Taxis and auto-rickshaws · Self-drive and chauffeured cars · Campervans · Motorbikes and scooters · Bicycles · Ferries and cruises · Houseboats and water taxis · Cable cars · Walking and hiking · Your own car

For travelers

One timeline with live status on every leg, reminders before check-in windows, and tickets and documents in an offline trip wallet.

For transport providers

Routes, schedules, vehicles and seats, manifests and boarding, and live status shared with every passenger and their onward connections.

05 · VEHICLE RENTALS

The bike, scooter or car that fits the rest of the trip

Rentals are booked as part of the journey, compared by what they really cost and handed over fairly, and rental operators run their whole fleet on the same platform.

In the trip

Pick up at the station, airport or stay, timed to your other legs.

Full cost first

Rate, deposit, distance limit, fuel policy, delivery and protection together.

Fair handovers

Licence verified once; photos, odometer and fuel at pickup and return.

For rental operators

Fleet, rate plans, one booking queue, offline handover app, claims and utilization.

06 · ALL YOUR TRAVEL APPS, TOGETHER

Keep the apps you use. See the whole trip.

GGNomad brings the travel sites and booking apps you already use into one place: one search, one comparison by the real total, and every booking on one timeline.

One search, every source

GGNomad and the travel sites and booking apps you connect, searched together.

The real total

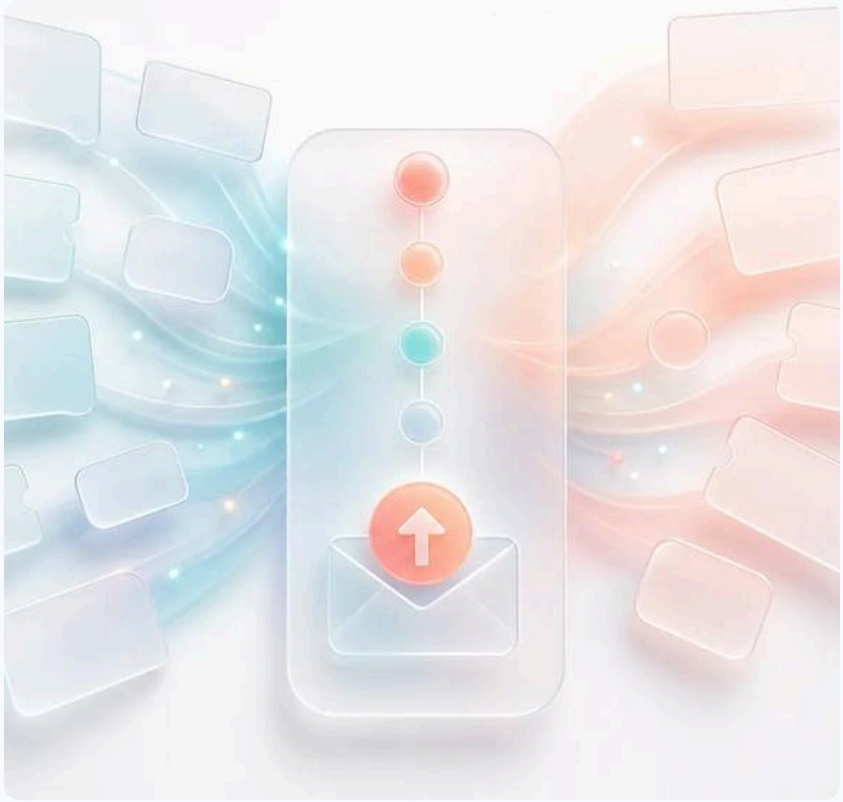

Fees, baggage, deposits and cancellation cost included in every comparison.

Every booking in one place

Forward a confirmation or upload a ticket; you confirm before it is added.

Kept in step

Imported bookings follow their source, and changes re-check the journey.

07 · TRAVEL TOGETHER

Groups that decide and pay fairly, communities that keep travelling

Any trip can be planned by a group, and any group can become a community that publishes and runs its own trips with operators, guides and rental fleets.

Decide together

Shared plan, options, comments and votes.

Pay fairly

One checkout or each their own share, costs split per item, settle up.

Together on the road

Meeting points, headcounts, opt-in time-limited location sharing and alerts.

Communities that travel

Clubs publish trips with seats, deposits and requirements, and keep a feed.

08 · RUN THE WHOLE BUSINESS

The whole tour lifecycle in one workspace

Tour and travel operators manage every product on one record, the same record the traveler and their group see.

Design · Contract · Price · Schedule · Sell · Manage · Assign · Prepare · Run · Close · Learn

Design and price

Tours built day by day from stays, activities and transport, costed with margin.

Sell everywhere

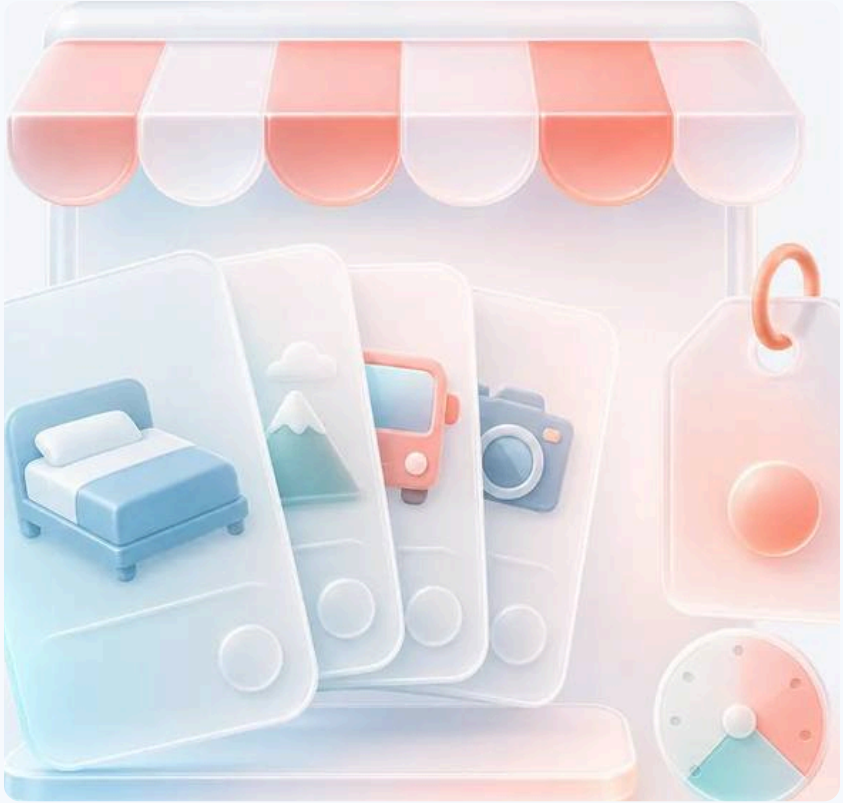

Storefront, GGNomad, connected channels, agents and custom quotes.

Run the day

Manifests, rooming lists, conflict-free assignments, run-sheets and headcounts.

Close and learn

Supplier reconciliation, settlements, commissions and departure P&L.

09 · EVERY TRAVEL BUSINESS

Fleets, transport, hosts and corporate travel on the same spine

Rental operators, transport providers, hosts, activity providers, venues and corporate travel teams run their own inventory and rules, and the day itself, on GGNomad.

Rental fleets

Allocation, offline handovers with photos, damage claims and maintenance blocks.

Transport providers

Routes, schedules, seats, boarding and live status to every passenger.

Hosts and venues

Listings, one booking queue for every channel, guest messaging and reviews.

Corporate travel

Policies, approval holds, offsites as group trips and spend summaries.

10 · AI NATIVE

A travel companion that knows your whole trip

Talk or type freely, in your own language, on web, mobile and messaging. The companion knows your plans, your group, bookings from every source and live transport status. It is personal and proactive, and it always asks before it books, pays or cancels.

Plan from a sentence

A priced, editable multi-leg plan with stays, rentals and activities.

Compare every source

Options from GGNomad and connected apps, compared by the real total.

Book with your say-so

It prepares bookings and changes, and goes ahead only when you confirm.

Watch every leg

Delays, broken connections, check-in windows and price drops, with options.

Re-plan on disruption

Rebooks the broken leg and tells the stay, the rental desk and the group.

Guide and translator

What to do nearby, how to get there, menus, signs and conversations.

Operator copilot

Drafts quotes, flags departures at risk and answers routine traveler questions.

In bounds

Your permissions, your confirmation, metered and audited.

11 · ACTIVITIES AND ENTERTAINMENT

The festival, the stay and the ride home, as one plan

Stays, tours, experiences, attractions, events, shows and nightlife are discovered by place and date and booked on the same timeline as the travel.

Event-first trips

Pick the festival, match or show; GGNomad plans the journey around it.

Fill the free time

Tours, classes, adventure and nightlife that fit the gaps in your plan.

Tickets in the wallet

QR tickets issued, redeemed at the gate and kept offline.

Bundles

Operators sell event-plus-stay and tour-plus-transport as one product.

Put to work

BACKPACKER

A four-mode journey, planned as one

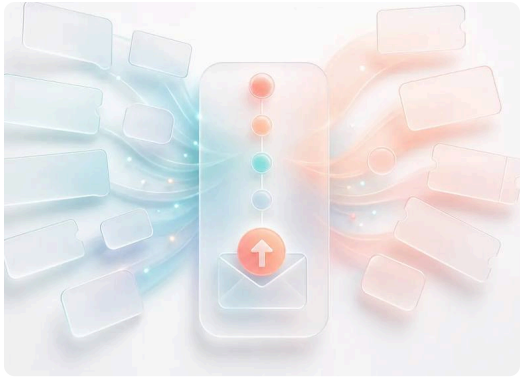

A flight, a sleeper train, a ferry and a rented scooter, with every connection checked before booking.

ROAD TRIPPER

A scooter for the beach week

Delivered to the homestay, compared by full cost, handed over with photos and extended on the road.

FREQUENT TRAVELER

Every booking in one place

Confirmations from other apps forwarded in, confirmed, and kept in step with their source.

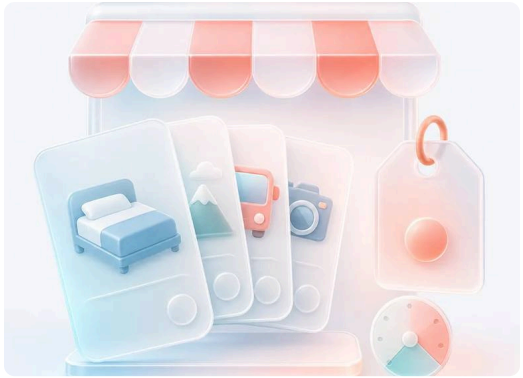

Put to work, continued

COMMUNITY ORGANIZER

A riding club’s annual ride

Seats and deposits, verified licences, rented bikes for members and check-ins on the road.

TOUR OPERATOR

A heritage tour from idea to sale

Designed day by day, costed with margin, scheduled and sold on every channel.

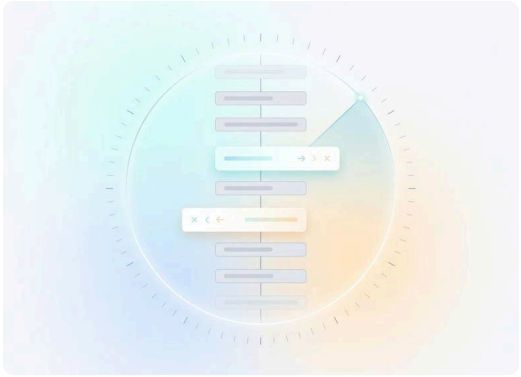

OPERATIONS MANAGER

A departure day without the scramble

Manifests build themselves, assignments are conflict-free and the day runs from a live run-sheet.

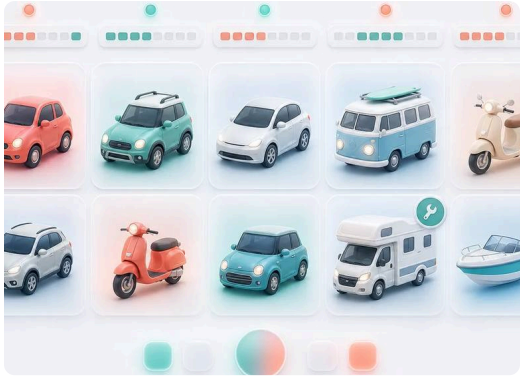

Put to work, continued

TRAVELER ON THE MOVE

Plan B before the traveler asks

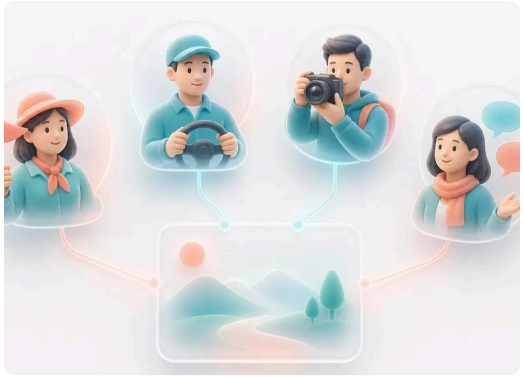

A delay breaks a connection; the companion rebooks on one tap and updates the stay, the car and the group.

RENTAL OPERATOR

A rental shop on one system

Bookings from every channel in one queue, offline handovers and evidence-backed claims.

TOUR OPERATOR

Guides and drivers through ProServiceWorld

Professionals found, booked and assigned to departures, then settled after the job.

13 · THE BURDENOFF ECOSYSTEM

Specialist Burdenoff products around every trip

GGNomad owns the trip, the booking spine and travel operations, and connects to the right Burdenoff product for each job, under one sign-in, one workspace and one set of permissions.

MoveTheWheels
Fleet tracking and telematics for rental fleets and tour vehicles; luggage and equipment shipping.

AssetHandler
Lifecycle and maintenance of rental vehicles, boats, bikes and equipment.

PlanMagnet
Project management for tour programmes, launches and large group trips.

EventfullyManaged
Events a trip is built around, with group travel and stays for attendees.

ComradeCircle
Travel communities, channels and member engagement.

FluidGrids
Booking, supplier, pre-departure and accounting automations.

HeadshotMarketing
Campaigns, leads, traveler segments and repeat-traveler programmes.

ProServiceWorld
Hiring guides, drivers, photographers and translators.

And the rest of your world, through connectors and the API

Travel sites and booking apps you connect · Transport status · Maps · Mail and calendars · Channel feeds · Payments · API and webhooks

14 · EVERYWHERE YOU TRAVEL

One platform, many front doors

The same trip record and permissions behind every surface, from the planning desk to the rental counter and the platform edge.

Web app

The complete product for travelers and businesses at app.ggnomad.com.

Mobile apps

Trip wallet, live timeline, voice companion, offline mode, handover photos and ticket scanning.

Desktop apps

The operator console and operations board.

Messaging channels

The companion and trip alerts where travelers already chat.

Operator storefronts

Public, bookable pages for every business.

Extension, SDKs, CLI and MCP

Save and import while browsing; automate and connect AI agents.

The right access for everyone, and consent for everything

Single sign-on
One identity across Burdenoff products, with OAuth for clients and integrations.

Roles on every action
Role-based access enforced at the gateway for every operation.

One identity, many roles
Traveler, host, guide, operator and admin, every action attributable.

Tenant isolation
Each business workspace isolated, with row-level security.

Consent by design
Connected apps, mailbox imports, location and documents are opt-in and revocable.

Documents per booking
Passports, licences and IDs encrypted and shared only with the provider that needs them.

Governed AI
Confirmation before AI bookings or cancellations, metering and audit.

Audit trail
Every change recorded with the actor, the target and the result.

The security page and subprocessor list are published on ggnomad.com.

Free to plan for travelers, a clear path for businesses

Travelers plan, compare, import and manage trips free and pay for what they book. Businesses start on the free plan, and a transparent fee applies to completed bookings; paid plans add capacity and capability. Current plans and prices are on ggnomad.com/pricing.

Business plan	Best for
Free	Trying GGNomad: a single host, guide or small rental shop, within the Free quotas.
Starter	Independent hosts, guides, small operators and rental shops.
Growth	Regional operators, multi-property hosts and rental fleets.
Business	Large operators and agencies with high volumes and deeper integrations.
Enterprise	Chains, large operators, corporate travel teams and destinations (contact sales).

What changes when the whole trip lives in one place

One trip record
Every leg, rental, stay, ticket and imported booking in one place.

Any mode, any vehicle
The journey does not care whether a leg is a flight or a houseboat.

Keep your apps
GGNomad brings them together instead of asking you to switch.

Travel is social
Any trip can become a group trip, any group a community.

One system for operators
From a single-guide walking tour to a multi-city fleet.

Help that knows the trip
The companion acts before the traveler has to ask.

Both sides, one record
A change on one side reaches the other at once.

Specialists connected
Burdenoff products do their own jobs, under one sign-in.
